BENEFIT-IN-KIND TAXATION

The company car Benefit-in-Kind Taxation scale is linked to the CO2 emissions level. The table right shows the percentage of the car price to be taxed (P11D value). A simple explanation of how to calculate BIK is shown below.

EXAMPLE OF HOW TO CALCULATE BIK

- Look at the table on the right and find the BIK tax banding to be applied according to the CO2 emissions of your car. (For example a petrol car emitting 99G/KM CO2 is 24%).
- Work out the car's price to be taxed (P11D value) which is calculated as: Total Retail Price (Basic Price + VAT) + Number Plate (£25.53) + Delivery costs (£700) + Options (Including VAT).

- Calculate the BIK as follows: P11D value x BIK tax banding percentage.
- Multiply BIK figure (from 3) by your personal tax band – i.e. 20% or 40% to give your annual BIK costs.

2023-25 % BIK RATE		
CO2 EMISSIONS (G/KM)	ELECTRIC MILEAGE RANGE	BIK
