

STELVIO

Etched into the mountainous Northern Italian border stands a rite of passage for those entering Italy by road. There, forty-eight hairpin turns at 2,743 m above sea level create a challenge only the bravest and most well-equipped driver would dare attempt. They do this in a quest to reach the epicentre of automotive performance, design and style. Inspired by the immensity and grandeur of the Stelvio Pass, the dreamers of Milan, the engineers of Modena and the artisans of Cassino have created the optimal vehicle for those demanding the highest level of performance and utility in equal measure. This is Stelvio.

The force of a legend

It began as a simple request for good luck and ended up becoming a symbol of something even greater: track records and race victories for Alfa Romeo and the drivers who championed their vehicles. In 1923, legendary Alfa Romeo race car driver Ugo Sivocci wanted to break a string of second-place finishes. To prepare for the legendary Targa Florio race through the mountains of Sicily, Sivocci painted a white square with a “Quadrifoglio,” or four-leaf clover, on the front of his Alfa Romeo RL Targa Florio. As luck would have it, he finished in first place. Weeks later, Sivocci was track-testing a new car that did not yet bear his lucky symbol. Tragically, he crashed and lost his life.

This marked the beginning of a tradition: the highest-performing Alfa Romeo cars would bear the four-leaf clover on a white triangle instead of a square — with the missing corner symbolizing the loss of Sivocci. Now, another Alfa Romeo proudly wears the legendary clover badge. Equipped with our most powerful production engine ever, the 505-horsepower Stelvio Quadrifoglio is the latest example of Alfa Romeo innovation, completely redefining the meaning of SUV.

A return to F1

This is a Formula 1 comeback story that restores the standing of one of the greatest names in motorsport history. Now, the legendary Alfa Romeo Quadrifoglio badge will appear on a Sauber C37, as it has on the brand's top performance cars since 1923. The iconic four-leaf symbol returns to the highest level of racing to show the world the continuing strength and success of the Alfa Romeo philosophy.

It demands the constant search for excellence; first applied to racing, then transferred in its entirety to the brand's production cars. Over one hundred years later, the legend continues.

Sauber F1® Team

TITLE SPONSOR

INNOVATION CONTINUES WITH
AWARD-WINNING ENGINE TECHNOLOGY
BORN FROM THE MINDS OF MOTORING'S
MOST PASSIONATE DESIGNERS.

Over one hundred years of motoring innovation are exemplified in the two powerplants offered by Stelvio. Both engines are built in Italy with state-of-the-art processes and methods, utilizing the very best of all-aluminum engine design technology — both are at the top of their class^{1*} in terms of performance.

Stelvio Quadrifoglio houses the most powerful production engine ever created by Alfa Romeo: a highly innovative, all-aluminum 2.9L Twin-Turbocharged V6 engine that delivers an exceptional 505 horsepower and 443 lb-ft of torque. The Quadrifoglio launches from 0 to 60 mph in 3.6 seconds¹ and reaches a top track speed of 285 km/h (176 mph).

The intrinsic value of AWD

Stelvio's standard Q4 All-Wheel-Drive (AWD) system combines the advantages of AWD with the performance and driving pleasure of rear-wheel drive (RWD). Under normal conditions, the Q4 AWD system sends 100% of the engine torque to the rear axle. When necessary, the system can automatically transfer up to 60% of the torque to the front axle for ultimate responsiveness and stability. The Active Transfer Case (ATC) continuously monitors road conditions to deliver ideal torque distribution, maximizing grip and performance.

DNA

ALFA DNA DRIVE MODE SELECTOR Alfa DNA Drive Mode Selector and Alfa DNA Pro Drive Mode Selector (exclusive to Quadrifoglio) instantaneously adapt the behaviour of the vehicle to the selected driving mode:

- **RACE** activates the overboost function for increased torque to maximize performance (exclusive to Quadrifoglio)
- **DYNAMIC** delivers sharper throttle response, enhanced steering feedback and performance shift-mapping for sporty on-road driving
- **NATURAL** is a comfort setting for a perfect balance in daily driving
- **ADVANCED EFFICIENCY** is engineered for maximum fuel efficiency; on Quadrifoglio, it includes cylinder deactivation

PATENTED ALFA LINK™ SUSPENSION

Stelvio excels at high-lateral acceleration with its front double-wishbone suspension. Its semi-virtual steering axis delivers rapid-response, accurate steering. In the rear, a patented 4^{1/2}-link system makes for optimum lateral grip and comfort, even on rugged road surfaces.

INTEGRATED BRAKE SYSTEM (IBS)

The innovative IBS combines stability control and other traditional brake system components into one unit, reining in all that Stelvio dishes out. Pedal-feel is acutely responsive, Antilock Braking System (ABS) vibration is minimized, and response time is instantaneous, making for short braking distances.

CARBON FIBRE DRIVESHAFT

The ideal power-to-weight ratio of Stelvio is the outcome of lightweight, high-tech materials — including carbon fibre for the driveshaft. It works to enhance Stelvio's overall balance, providing exceptional handling even in extreme conditions.

Nuances that satisfy every definition of performance

A VARIETY OF TRIM LEVELS FULFILLS A RANGE OF DRIVER PREFERENCES

STELVIO Ti

STELVIO QUADRIFOGLIO

Nuances that satisfy every definition of performance

A VARIETY OF TRIM LEVELS FULFILLS A RANGE OF DRIVER PREFERENCES

STELVIO

This is a vehicle that starts out where most vehicles end up. From stem to stern, Stelvio is equipped to impress right from the get-go. It starts with the standard Q4 AWD system, which encourages adventure, while its 18-inch Bright 5-spoke aluminum wheels with 235/60R18 all-season tires garner glances from enthusiasts and admirers alike. Bi-xenon headlamps with available automatic high-beam headlamp control offer advanced functions, while LED Daytime Running Lights (DRLs) and taillamps attract the right kind of attention. Stelvio reveals its racing DNA with accents like dual-chrome exhaust tips, brushed-aluminum window surrounds and brushed-aluminum roof rails. The sport-tuned suspension, standard with the Sport, brings driving to a whole new level. The Sport includes 19-inch Sport 5-hole aluminum wheels, Gloss Black window surrounds and roof rails. The interior adds a sport leather-wrapped steering wheel, steering-column-mounted aluminum paddle shifters and aluminum trim.

STELVIO Ti

The Ti takes Stelvio to a more expressive and personalized place, allowing drivers to opt for either performance or luxury amenities. Sharing all that the well-appointed Stelvio offers, Ti takes measures to assert its own personality, starting with 19-inch Y-spoke aluminum wheels with 235/55R19 all-season tires. The Ti indulges drivers with heated front seats and a heated steering wheel. The Ti Sport revs things up even more with 20-inch Sport aluminum wheels with 255/45R20 all-season performance tires, performance Sport seats, Gloss Black window surrounds and roof rails, and your choice of premium-painted brake calipers (Red/Black/Yellow). Alternatively, the Ti Lusso adds rare refinement with either genuine Dark Grey Oak Wood or Light Walnut Wood interior trim, a luxury leather-wrapped steering wheel, leather-wrapped dash and upper door trim, luxury leather trim seats with Cannelloni design, and 12-way power front seats, including 4-way lumbar support.

STELVIO QUADRIFOGLIO

Stelvio Quadrifoglio Marked with the four-leaf clover badge reserved for Alfa Romeo's most powerful machines, Quadrifoglio boasts an impressive 505 horsepower. A checklist of high-performance features complements its power: 20-inch Bright 5-hole aluminum wheels with front 255/45R20 and rear 285/40R20 high-performance tires, Quadrifoglio front and rear fascias, and a dual-mode quad exhaust. Powerful control has never been more personal with the 4-mode Alfa DNA Pro Drive Mode Selector, featuring Race Mode. An independent adaptive damping suspension, the standard torque vectoring rear differential and the available carbon-ceramic Brembo® brakes are all designed and engineered for the track. Performance leather trim/Alcantara® sport seats with power bolsters and thigh support further enhance; a leather-wrapped dash and upper door trim panels with accent stitching, genuine Carbon Fibre interior trim, and unique door sill scuff plates add finishing-line touches.

Serene's new benchmark

*With rear seats folded. Properly secure all cargo.

Ti Lusso shown with Black luxury leather with Cannelloni design and Dark Grey Oak Wood accents

1,600 L*

The great passion that goes into building Stelvio is infectious: the people who drive it share an outsize zeal for life — and all the gear that comes with it. Stelvio generously provides up to 1,600 litres (56.5 cubic feet) of cargo space for all the things your daily adventure requires. A flexible 40/20/40 split-folding rear seat and an available aluminum cargo compartment adjustable rail system ensure everything and everyone arrive ready to go.

HARMAN KARDON® PREMIUM AUDIO SYSTEM Designed to provide concert-like sound, the available 900-watt, 12-channel class-D amplifier and Logic 7® sound technology distribute clear sound through 14 premium speakers with a subwoofer — proof that Stelvio is built to carry tunes as well as cargo.

Seamless connectivity

DON'T HOLD THE PHONE: KEEP GOING ABOUT YOUR DAY (OR NIGHT) WITH THE INTUITIVE AND INDISPENSABLE FEATURES OF APPLE CARPLAY³ — THEY ONLY ADD TO THE PLEASURE OF DRIVING STELVIO.

APPLE CARPLAY³ COMPATIBILITY This is smarter iPhone® integration, so you will experience your favourite features through your dashboard. With Siri^{®4} all you have to do is ask — catch up on calls and messages, get directions from Apple Maps or request a song through Apple Music. The system lets you browse music or discover nearby gas stations, parking, restaurants and more. Plus, Maps helps to predict where you're headed. Standard.

IT USED TO BE THAT YOU DIDN'T WANT ANYONE TELLING YOU WHERE TO GO OR WHAT YOU COULD LISTEN TO ... BUT ANDROID AUTO^{TM3} WILL DEFINITELY MAKE YOU RETHINK ALL THAT.

ANDROID AUTO³ INTEGRATION For those who know and love AndroidTM, GoogleTM goes with you thanks to navigation and "OK Google" voice detection; you'll also hear your favourite Google Play music and get voice-guided navigation⁹ from Google Maps. Stay focused and productive while on the road with voice controls⁵ that allow you to make calendar appointments, set timers, reply to emails and messages — and more. Standard.

android
auto

An extra measure of calm

HILL START ASSIST (HSA) AND HILL DESCENT CONTROL (HDC)

These standard systems aid the driver during manoeuvres when the vehicle is on a slope. HSA maintains and releases brake pressure during vehicle drive-off, while HDC maintains a constant speed by varying brake pressure, allowing a controlled vehicle descent.

LANE DEPARTURE WARNING (LDW)⁶ Drivers benefit from this available feature that emits an audio and dash-light visual warning when detecting inadvertent lane departure, reminding the driver to stay the course.

DYNAMIC STEERING TORQUE (DST) Electronic Stability Control (ESC)⁷ directs the Electric Power Steering (EPS) to produce optimal stopping stability. It provides greater stability in certain braking and dynamic situations — like when there is a different adherence for each wheel.

FULL-SPEED FORWARD COLLISION WARNING (FCW) PLUS⁶ This available system provides autonomous braking and can bring the vehicle to a full stop when a frontal collision may be imminent.

ADAPTIVE CRUISE CONTROL WITH FULL STOP (ACC Stop)⁶ This available system helps drivers maintain a safe distance from the vehicle ahead and, under certain traffic conditions, can bring the Stelvio to a full stop without driver intervention.

ANTISLIP REGULATION (ASR) AND TRACTION CONTROL SYSTEM (TCS)

The standard ASR limits the spin of the driving axle during a driver torque request in the event the adherence limit is reached, optimizing vehicle traction. Standard TCS limits the wheelspin of a single drive wheel by applying brake torque to the wheel while an equivalent amount of torque is transferred via the differential to the other wheel, providing the vehicle the torque required to drive away.

AIR BAG SYSTEM⁸ Stelvio features a standard comprehensive system that includes driver and front-passenger dual advanced air bags,⁸ supplemental front-seat-mounted side air bags⁸ (pelvic-thorax), front and rear side-curtain, along with driver and front-passenger inflatable knee air bags.⁸

ALFA STEERING TORQUE (AST) The AST functionality takes advantage of the integration with the Electronic Stability Control (ESC)⁷ system and electric steering in order to increase the safety level of the vehicle. Thanks to the AST system, in dangerous situations like braking on a surface with varying grip, the ESC⁷ system orders the activation of additional torque on the steering wheel.

BLIND-SPOT MONITORING (BSM)⁶ This available system has dual ultra-wideband radar sensors that aid the driver when changing lanes, and when trailing vehicles are in the blind spot, via an illuminated sideview-mirror icon.

REAR CROSS-PATH DETECTION⁶ This available system is activated anytime the vehicle is in Reverse. It lets the driver know with illuminated icons on the sideview mirror and with an audible chime.

BACK-UP CAMERA⁶ WITH DYNAMIC GRID LINES is standard on all models.

PARK-SENSE[®] REAR PARK ASSIST SYSTEM⁶ is standard on all Stelvio models. When the vehicle is in Reverse, this system uses sensors to provide audible and visual warnings to help detect nearby objects in the rear pathway. Assists with manoeuvring in tight spaces at parking speeds. Front Park Assist⁶ alerts the driver with audible and visual warnings when objects come in close proximity to the front of the vehicle. Available on Stelvio/Stelvio Sport and standard on all other models.

The best arrivals begin with a great departure

The Stelvio profile forecasts its dynamism with a sleek outline, wheels that take an aggressive stance and a steeply raked, aerodynamic rear liftgate.

Nero Edizione

Get a taste of what Stelvio has in store for you with seductive and striking accents that capture its dark side. This special edition Stelvio offers: 20-inch Miron Black Sport aluminum wheels (Dark 5-hole on Quadrifoglio) • Dark Miron V-Scudetto grille surround • Dark Miron exterior mirror caps • Custom-painted brake calipers (Red/Black/Yellow) • Dark exhaust tips • Dark Miron rear fascia appliqué • Gloss Black roof rails • Gloss Black window surrounds • Monochromatic wheel caps with Alfa Romeo logo • Dark Miron exterior badging
